Education
Provider**

Provider Name: Balco, Inc.

Provider Number: K437

Program Title: Expansion Joints 101 Introduction to Expansion Joint Technology

Course Number: B0390EJC

Length: 1 Hour

Credit: 1 CEH

HSW: Yes

Course Description

Buildings are not static structures and may move as a result of thermal expansion and contraction or because of wind or seismic activity. In this course, you will learn about Architectural Expansion Joint Systems and the way they allow buildings to move without causing damage or becoming unsafe to occupants.

HSW Justification:

To provide a safe path to navigate a building

Learning Objectives

Upon completion of this course, you will be able to:

- Identify the function, purpose, and characteristics of building expansion joint openings
- Explain the importance of expansion joint systems
- Describe how expansion joint systems work
- Identify the most common types of expansion joint systems
- Define expansion joint systems building code requirements
- Understand best practices related to installations and effectiveness

Method of Delivery

Lunch and Learns are offered at no cost to your firm. Please call our home office to make an appointment for this presentation. Course credits will be reported to AIA for continuing education credits.

Cost to Participants

Free
