

**AIA/CES Registered Provider
Program Summary**

**AIA
Continuing
Education
Provider**

Provider Name: Balco, Inc.

Provider Number: K437

Program Title: Fundamentals of Photoluminescent Egress System Products

Course Number: B0401PL

Length: 1 hour

Credit: 1 CEU

HSW: Yes

Course Description

An overview of the fundamentals of photoluminescent egress system products including terminology, designs, and applications.

HSW Justification:

To create a guided path for egress.

Learning Objectives

Upon completion of this course, you will be able to:

- Learn the history, purpose and proper material usage of photoluminescence
- Define the need for photoluminescence in a building and view related building codes
- Understand the performance standards of photoluminescence
- Identify and specify proper photoluminescent components for a particular application

Method of Delivery

The CES facilitator utilizes a PowerPoint or slide presentation to introduce the audience to the fundamentals of photoluminescent egress system products, giving them a general knowledge of the subject. Participants receive a reference sheet as a handout. Course credit will be submitted to AIA for continuing education credit.

Cost to Participants

Free
